

<b>Source of financing</b>	Grant funding for scientific and (or) scientific and technical projects for 2023-2025 (Ministry of Science and Higher Education of the Republic of Kazakhstan)
<b>Priority areas</b>	Research in the field of social sciences and humanities
<b>Specialized scientific directions</b>	Actual problems of social modernization: demography, migration, quality of life and human resources, socio-economic inequality, employment and unemployment, scientific organization of labor, safety and labor protection
<b>Project identification registration number:</b>	AP19676100
<b>Name of the project:</b>	«Development and testing of methods of employment of socially vulnerable segments of the population»
<b>Project manager</b>	Saule Okutayeva, PhD, Associate Professor
<b>Terms of implementation</b>	2023-2025 yy.
<b>Relevance</b>	The relevance of the research topic is determined by the need to create conditions for the employment of socially vulnerable segments of the population, the development of their labor potential and social integration into society. It is necessary to understand that the process of employment and direct work with a socially vulnerable category of people has its own characteristics. The team of authors suggests considering the problems of socially vulnerable strata not through the prism of their vulnerability, but through the prism of the labor market and their functional use in enterprises. In Kazakhstan today there is no single developed methodology for solving the issues of employment of citizens from these categories. In this regard, it is important to create a scientifically based method of employment of socially vulnerable categories of the population and to test it in Kazakhstan.
<b>Purpose</b>	Development and testing of methods of employment of socially vulnerable categories of the population
<b>Expected result</b>	Grant funding for scientific and (or) scientific and technical projects for 2023-2025 (Ministry of Science and Higher Education of the Republic of Kazakhstan)
<b>Target consumers of the results obtained</b>	Research in the field of social sciences and humanities
